

Vignobles BONNET

In 1952, Pierre Bonnet took the helm of the site and the Bonnet family became part of the history of the vineyard. After his death the old castle was sold, but the whole winery structure, currently coordinated by **Franck Bonnet**, is still preserved by the family. Despite their attachment to land and traditions of the profession, winegrowing represents a universe in constant evolution to Franck.

Testing new technologies, cultural practices and winemaking are part of the profession and the pleasure in exercising it.

New techniques and improvements are adopted, which especially are reducing environmental impacts and definitely improving the quality of wines.

Our wines reflect this alliance between modernity and tradition. They express the minerality and complexity of our terroir.

The aromas of our traditional varieties of grapes enhance delicacy and greed, and never erase the personality of our wines.
